Retail market fundamentals in the Inland Empire remain tight from a historical perspective but have softened a touch. Space availability has expanded 80 basis points from a decade's-plus low, reaching 6.4% as of the fourth quarter of 2024. Nevertheless, availability is still down substantially from an early pandemic-era peak of 8.1%. Retailers expanded in the market to meet a rise in resident buying power driven by higher-income households moving into the area for its affordability.

However, net absorption moderated to slightly over 500,000 SF in 2023 and ran negative in the first three quarters of 2024. Closed furniture stores, department stores, Big Lots and 99 Cents Only stores drove the recent occupancy losses. Absorption is not likely to ramp up in the next few quarters as leasing activity remains a bit subdued. New quarterly leasing volume has averaged under 1 million SF in 2023-24, declining slightly from 2021-22 levels and falling 25% short of the market's prior decade quarterly average. Market observers have noted that a lack of competitive available space

contributed to weaker leasing and slower retail tenant occupancy expansion.

Subdued leasing and negative absorption also reflect a slowdown in local economic expansion. Employment growth slowed to 1.6% in 2023 and is on pace to rise near 2% in 2024. Migration into the market has slowed from pandemic-era highs. Local consumer spending has remained stable for more than a year, generally trending between 5% and 10% above pre-pandemic levels on a weekly basis. Assuming the economy continues to expand at a slow pace, vacancies will remain compressed.

Property owners are pushing market rents higher, but at a slower pace than in recent years, as local retail spending remains level and space availability inches higher. Average market asking rent levels are forecast to increase approximately 3% this year, closer to historical averages, following a 5% increase last year and a record 6% increase in 2022.

KEY INDICATORS

| Current Quarter | RBA | Vacancy Rate | Market Asking Rent | Availability Rate | Net Absorption SF | Deliveries SF | Under Construction |

| Sales Volume | \$1.2B | \$1.2B | N/A | \$2.6B | 2022 Q3 | \$398.2M | 2010 Q1 |

Vacancy in the Inland Empire has expanded by 60 basis points since the end of 2023 due to supply additions and a rare loss of tenant occupancy. Although vacancy has increased from all-time lows, it is still tight historically, trending at 5.9% as of the fourth quarter of 2024. Tenant competition for well-located retail space remains substantial – the median time on market for available space has fallen under 12 months, slightly quicker than pre-pandemic leasing velocity.

The tightest retail submarkets across the Inland Empire coincide with areas where housing development has been rampant. The Airport Area and South Riverside submarkets register availability rates below 5% and stronger net absorption over the trailing year compared to areas farther east with slower housing development and population growth.

Net absorption was robust at roughly 2.5 million SF annually in 2021-22 but limited more recently in part due to a lack of desirable vacant space in the market. Net absorption subsided to 585,000 SF in 2023 and was negative in the first three quarters of 2024. New vacancies include an 86,600-SF freestanding building offered for lease or sale, 14444 Atstar Drive in Victorville, that was vacated by the furniture store Howard's. Also, a 134,000 SF building at the Montclair Place mall, formerly occupied by Nordstrom, was listed for lease, and an 80,500 SF building in the Highland Avenue Plaza was vacated by Bundle City Outlet.

In the second quarter, 99 Cents Only vacated Date Palm Plaza in Cathedral City, a retail site with over 109,000 SF of existing space and seven developable pads. The site was offered for lease between \$12/SF and 18/SF modified gross and for sale at \$13.9 million as a potential development opportunity. In addition, Sears vacated 78,000 SF at The Mall of Victor Valley, which is available for lease. Third quarter absorption was still negative due to move-outs by KMart and Big Lots, among others.

New leasing volume in 2023 and into 2024 has fallen short of 1 million SF per quarter on average, below the market's prior three-year average and 25% short of its prior decade average. As a result, availability has increased by 1.3 million SF since the beginning of 2023 to 13.1 million SF, or 6.4% of inventory.

Availability in the Inland Empire has trended above the national average since the global financial crisis recession, partly due to an excessive amount of undesirable inventory. The demolition of the zombie Carousel Mall in downtown San Bernardino in late 2023 removed a large block of vacant, unavailable space from the market. In recent years, some of the older big-box buildings have been leased to cannabis growers, recreational vehicle storage companies, and other storage-related users rather than traditional consumerfacing retail tenants.

Retailers in the Inland Empire depend on local consumers as leisure travel in the market is modest, and the area's supply caters to local demand, with roughly 40% of inventory constituted of neighborhood centers, compared to the national average of 26%. Rising demand for both in-line and anchor spaces within neighborhood centers drove availability in the subtype to a 25-year low of 7.9% at the end of 2023, but it has since increased to 8.5%. Mall availability rose most substantially in 2023 and slightly higher in 2024, currently measuring 8.4%. Strip center and power center availability trends at 6.3% and 5.6%, respectively. Availability among general retail buildings, which are often freestanding, also registers just 5.6%.

Experiential entertainment providers have been active. For example, Ninja Factory leased 14,000 SF in Rancho Cucamonga, and The Axe Lair leased 6,500 SF in Upland in 2024. Gyms are still expanding. EOS Fitness signed two new leases in 2024, and Garcia Boxing Gym took space in Moreno Valley. Dollar Tree signed six new leases in 2023 and over ten in 2024, the majority stemming from takeovers of closed 99 Cents stores.

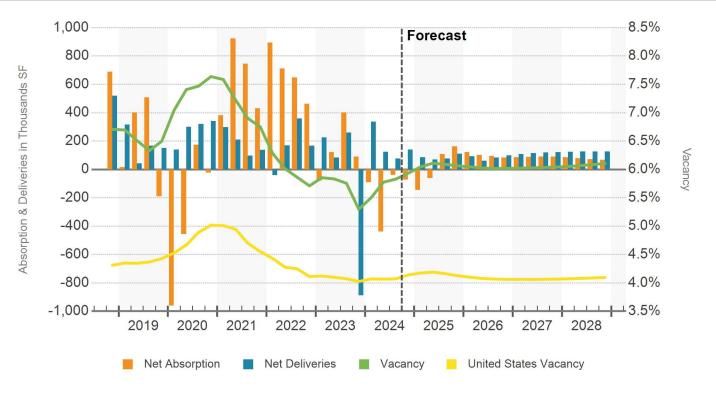

Vallarta Supermarkets is expanding into the market, signing a 60,000-SF lease at Orchard Plaza in Rancho Cucamonga in early 2024, following a 50,000-SF lease in Hemet Village in June 2023, and pre-leasing another 50,000-SF space at the Van Buren Marketplace in Jurupa Valley in 2022. Grocery Outlet has signed four leases in 2024, taking down 75,000 SF in total.

^{*}Renewal

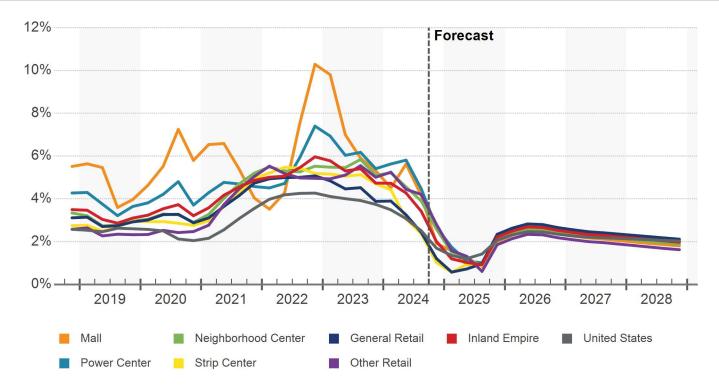

Rents for retail space in the Inland Empire are rising, but the pace of increase has decelerated from record levels as availability has lifted slightly higher and leasing has moderated. Rent growth has decelerated from 6.0% in 2022 to 5.0% in 2023 and measures 2.5% over the trailing year as of the fourth quarter of 2024.

Rent growth among neighborhood centers registers slightly above market average, at 3.0% due to historically compressed availability in the sector. Conversely, availability among general retail space has expanded from two years ago, leading to a deceleration in rent growth, down to 1.6%.

Due to a severe downturn in rents that lingered for over five years following the global financial crisis, it took more than 15 years for retail rents in the Inland Empire to recover to their pre-Great Financial Crisis levels, a feat reached in 2022. Rents average \$27.00/SF, triplenet as of the fourth quarter of 2024, overtaking the national average again in 2019. Although local rent growth has decelerated, it still outpaces the 2.0% national increase, continuing a trend in place since 2016. Looking ahead, rent growth decelerates along with the national average in 2025 but still outpaces it.

MARKET ASKING RENT GROWTH (YOY)

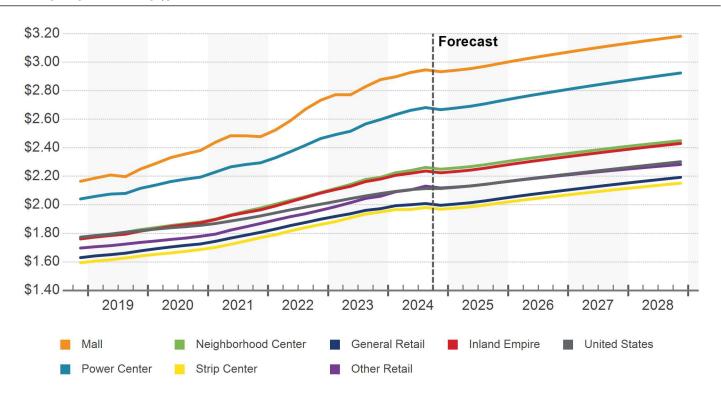

MARKET ASKING RENT PER SQUARE FEET

Retail development in the Inland Empire has been moderate over the past ten years and is concentrated in submarkets where housing development has been more active. Deliveries have generally trended lower since 2018 and, in 2023, fell slightly short of the market's prior decade average with less than 650,000 SF of space completed. Deliveries are scheduled to pick up slightly in 2024, reaching nearly 850,000 SF.

Due to the demolition of the roughly 900,000 SF Carousel Mall in San Bernardino, net supply change over the trailing year measures 130,000 SF. The aged mall fell out of favor as the population grew in suburban areas, and new malls developed nearby raised competition. Renaissance Downtowns USA and ICO Real Estate Group won the contract to redevelop the property, primarily into housing. In place of the mall, developers and city leaders envision 2,000 to 3,500 residential units along with market-driven retail and office components.

As of the fourth quarter of 2024, 900,000 SF of retail inventory is under construction market-wide. Construction activity has picked up slightly in 2024, with several new projects initiating construction. In Highland, just West of 210, Greenspot Crossings started construction on 150,000 SF of new retail space that is now leasing, as well as 110 multifamily and townhomes. Starbucks, Ono Hawaiian BBQ, Chipotle, and Dave's Hot

Chicken have pre-leased pads in the center, and its major site will be 46,400 SF.

Several shopping centers have been developed in South Riverside County. In Murrieta, at The Vinyard across from Vista Murrieta High School west of I-215, where a 151,000 SF Costco and 22,000 SF Aldi opened in 2023, one remaining smaller pad building is available for lease or sale. On the other side of I-215, a 107,900 SF Home Depot and 25,000 Ross Dress for Less are under construction at The Orchard Center, where two proposed Drive-thru pads are available.

Krikorian Premiere Theatres was developing a 120,000-SF community center anchored by a 14-screen movie theater in Menifee, but construction work at the site halted in 2020 at the onset of the pandemic and did not resume. The city issued a notice to demolish the incomplete theater building at the site in September 2023. Retail pads at the site have resumed construction.

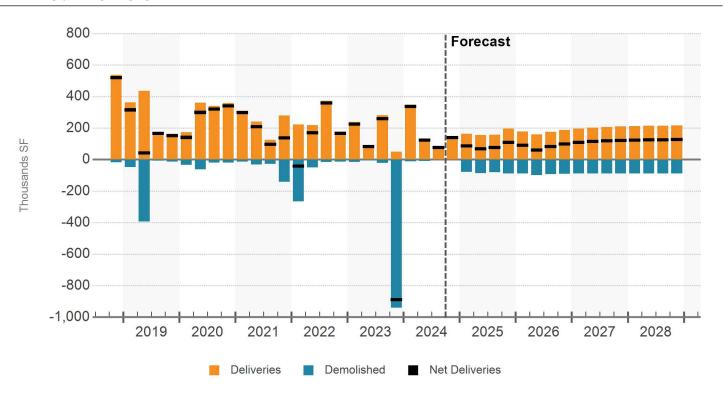

Partially completed in the first quarter of 2024, Town Center at the Preserve, a 170,000-SF retail development at the center of a master-planned community in Chino, represents the area's first significant completion in over 5 years. Lewis Companies, a local developer building several Inland Empire shopping centers, pre-leased the development's 55,500-SF anchor space to Stater Bros. supermarket.

Retail sales volume in the Inland Empire rose to a sixquarter high in the third quarter of 2024, surpassing \$400 million. Annual sales volume in 2024, though three quarters, totaled over \$850 and will likely exceed 2023's \$1.2 billion total. Activity could continue to increase heading into 2025 as interest rates have stabilized more recently.

Higher interest rates and stricter lending standards have cooled investment among institutional investors and REITs especially, which only account for 6% of acquisition volume over the past three years, down from 12% historically. Users account for 10% of buyer volume in the past three years, up slightly from historical averages.

Cap rates in the Inland Empire trend significantly above Southern California's coastal markets, where acquisition demand remains stronger. As yields adjust to higher capital costs, cap rates have expanded by more than 100 basis points from a low of 5.2% in 2022, rising into the 6% range in 2024.

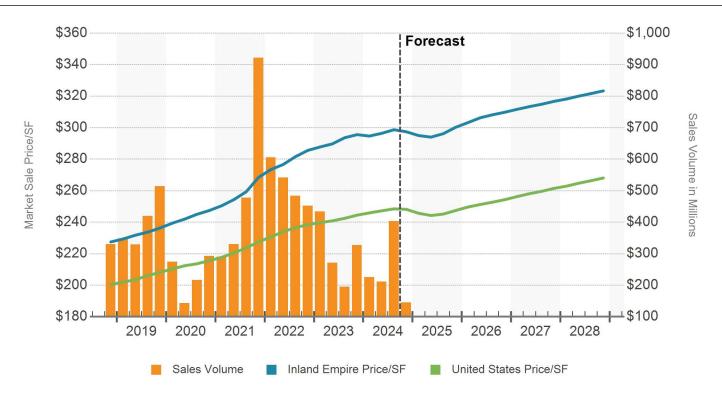

For example, a nearly 33,000 SF building occupied by

LA Fitness Esporta Fitness in San Bernardino's University Towne Center traded between private investors in June 2024 for \$9.3 million, or \$285/SF, at a cap rate of just under 7%. The seller used a 1031 exchange. Esporta Fitness has five years remaining in its primary lease term and four additional five-year extension options with 3% annual increases.

Private investors traded the fully leased Shoppes at Rancho Del Chino, a 15,500 SF center shadow-anchored by Home Depot, for \$7.4 million, or \$479/SF, at a 6.2% cap rate in April 2024. The asset was fully leased at the time of sale but marketed as a value-add opportunity, with current rents 25% below market rate at an average of just under \$30/SF, triple-net.

Single-tenant net leased assets are still attracting robust investment interest. Representing one of the most coveted assets in commercial real estate as a virtually risk-free investment, a brand new 4,100-SF building in San Bernardino leased to 7-Eleven for 15 years with 10% rent increases every 5 years traded at a 5.1% cap rate in January 2024. Truck stops and service stations have also traded at cap rates of around 5%.

The Inland Empire leads Southern California in postpandemic job growth and has significantly outpaced the national average, with an aggregate 7% gain based on an increase of over 110,000 workers. Furthermore, the Inland Empire is bucking the trend of moderating job growth seen nationally in 2024.

Although the market's 1.6% expansion in payrolls in 2023 fell short of the average 3.4% growth rate achieved over the past ten years, the pace of job growth is accelerating and slightly outpaces the national average. Inland Empires' job growth forecast also outperforms the national average, based on the continuation of positive trends established over the past decade. The market is becoming more expensive but still maintains a competitive advantage of affordability, and many commercial real estate developments underway across the market will provide capacity for additional employment opportunities.

Bolstered by e-commerce growth and industrial space development, transportation and warehousing account for the majority of post-pandemic job growth in the metro. Employment in the sector has expanded nearly 30% from pre-pandemic levels to over 200,000 workers. However, it remains below 2022 highs, along with wholesale trade employment.

Due to the market's affordable and abundant land near Southern California's twin ports, most national retailers have established warehouse and distribution centers in the area, and third-party logistics providers expanded alongside them as e-commerce adoption accelerated. The twin ports process roughly a third of all U.S. imports, much of which is transported further inland via rail and

highway. Imports are rebounding in 2024 now that West Coast dock workers have agreed to a new labor contract.

Amazon continues to expand at a brisk pace. The ecommerce giant opened its first California fulfillment center in San Bernardino in 2012, expanding to over 40 industrial buildings across the Inland Empire today and becoming the market's largest public company, employing roughly 30,000 local workers.

Now boasting 4.7 million residents, the Inland Empire ranks as the 11th-most populated market in the nation. Employment levels rank slightly lower due to Inland's high proportion of retirees. Attracted to the market's consistently warm weather and affordability, a plethora of retirement communities generate outsized demand for healthcare services and medical-related real estate. Tourism is vibrant in Palm Springs, Big Bear, and Temecula, primarily attracting in-state travelers.

Major cities are concentrated in the southwest portion of the market, lining Interstate 15, which runs northeast to Las Vegas, and Interstate 10, which runs east across the Southern U.S. Roughly within an hour's drive from Los Angeles, Riverside is the largest Inland Empire city with over 310,00 residents, followed by over 200,000 residents in San Bernardino, Fontana, and growing Morena Valley.

San Bernardino is the largest county by land mass across the continental U.S., spanning over 20,000 square miles from Los Angeles to California's border with Nevada and Arizona. Running east from Orange County, Riverside County adds another 7,200 square miles to the combined Inland Empire market area.
